**From:** RUSSELL GLASS [russell.glass@uspto.gov]  
**Sent:** Tuesday, June 26, 2007 11:50 AM  
**To:** STIC-EIC3600  
**Subject:** Database Search Request, Serial Number: 10086779

**Requester:** RUSSELL GLASS (P/3626)  
**Art Unit:** TC 3600 - GROUP ART UNIT 3626  
**Employee Number:** 81380  
**Office Location:** KNX 05A24  
**Phone Number:** (571) 272-3132  
**Mailbox Number:** 571-272-3132

**Case serial number:** 10086779  
**Class / Subclass(es):** 705/2-3,  
**Earliest Priority Filing Date:** 2/28/2001  
**Format preferred for results:** Paper  
**Search Topic Information:**

The crux of the invention is described in the following exemplary claims:

A process, method or system wherein said composite physical therapy treatment goal is dynamically modified to create at least one edited treatment goal identified for the patient based upon a development evaluation of said patient during at least one treatment modality.

A program code comprising a code for dynamically modifying said composite physical therapy treatment goal to create at least one edited treatment goal identified for the patient based upon a development evaluation of said patient during at least one treatment modality.

**Special Instructions and Other Comments:**

Please conduct a 3600 business methods template search ASAP. Contact me at 571-272-3132 or russell.glass@uspto.gov for further search instructions if needed.

# STIC Search Results Feedback Form

**EIC 3600**

Questions about the scope or the results of the search? Contact *the EIC searcher or contact:*

**Karen Lehman, EIC 3600 Team Leader  
(571) 272-3496 Knox 4B68**

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

**Comments:**

**Drop off or send completed forms to EIC3600 Knox 4B68**

**Non-invasive medical treatment system with scanner input for removal of tumors, has computer that enables sufficient time exposure of target tissues with electromagnetic wave of selected frequency**

Patent Assignee: WILK P J (WILK-I)

Inventor: WILK P J

Patent Family (1 patents, 1 countries)

Patent Number	Kind	Date	Application Number	Kind	Date	Update
US 6112110	A	20000829	US 1997779406	A	19970107	200061 B
			US 1999249946	A	19990212	

Priority Applications (no., kind, date): US 1997779406 A 19970107; US 1999249946 A 19990212

#### Patent Details

Number	Kind	Lan	Pg	Dwg	Filing Notes
US 6112110	A	EN	12	5	Division of application US 1997779406

Division of patent US 5899857

**Alerting Abstract ...ADVANTAGE - Improves and automatic control of surgical operations of possible. Since the computer controls frequency generator module, focusing element and patient support based on the image of target tissue picked up by scanner...**

#### Original Publication Data by Authority

#### Claims:

...the patient, said organic structure including said target tissues, said scanner including means for continually **updating** said three-dimensional data during a medical treatment procedure; and a computer operatively connected to said scanner for continually monitoring location and shape of said organic structure...

NUMBER OF REFERENCES: 21

Neurological rehabilitation is multiprofessional, interdisciplinarily **interactive** and **client** oriented. We describe tasks, functions, professional training and legal status in Germany of the various...

...in the rehabilitation team. An international comparison reveals that there are considerable deficits in community- **based** neurological rehabilitation services in Germany. Team organisation and decision structures in Germany correspond only partially to international **developments**. Rehabilitation structures and services should take into account that in the course of neurological **rehabilitation** the **focus** of service **changes** from medical treatment to psychosocial interventions.

**Development and impact of a computerized pediatric antiinfective decision support program.**

**OBJECTIVE:** **Computerized** medical decision support tools have been shown to improve the quality of care and have...

...per antiinfective course decreased 11.5%, and the robust estimate of the antiinfective costs per **patient** decreased 9%. The type of anti-infectives ordered and the number of antiinfective doses **per patient** remained similar, as did the rates of adverse drug events and antibiotic-bacterial susceptibility mismatches. The surveyed clinicians reported that use of the

program **improved** their antiinfective agent choices as well as their awareness of impairments in renal function and...

... Use of the pediatric antiinfective decision support tool in a PICU was considered beneficial to **patient** care by the clinicians and reduced the rates of erroneous drug orders, **improved therapeutic dosage targets**, and was associated with a **decreased** robust estimate of antiinfective costs **per patient**. antiinfective agents, decision support systems, drug therapy, medication errors, child, infant.

**Treatment participation and outcome among problem drinkers in a managed care alcohol outpatient treatment program**

Hu, Teh-wei; Hunkeler, Enid M; Weisner, Constance; Li, Elizabeth; et al  
Journal of Mental Health Administration v24n1 PP: 23-34 Winter 1997  
ISSN: 0092-8623 JRNL CODE: MHA  
WORD COUNT: 4808

...TEXT: not affect continued abstinence through the sixth-month period.

The Markov analysis demonstrates the very **dynamic** process of treatment participation and outcome. A great deal of starting and stopping treatment, as well as experiencing **success** and relapse, occurs for **patients**. Although treatment providers ...studies acknowledge it, these patterns are seldom identified and examined. The findings also reflect very **dynamic** mechanisms between both treatment characteristics and patient characteristics. They raise questions having to do with...

...during the course of treatment. These characteristics potentially include a wide range of factors, including **changing treatment goals**, **changing** family and other support systems as treatment success or failure occurs, and changing mental health...

...in substance abuse treatment? Journal of the American Medical Association, in press.
